

**Dear Congress:**

Our school is participating in Safe Routes to School to get more children walking and bicycling to school safely. Safe Routes to School programs help make communities safer for everyone who walks and bicycles, get more kids and families healthy and active, and cut down on traffic congestion and pollution—all of which makes our community more livable.

I support Safe Routes to School because:

Thank you for creating the Safe Routes to School program, and I hope you will support expanding the program in the next federal transportation bill.

Sincerely,
